

HARWIN

New Product Announcement

EZ-Cable Clips

Features

- Replaces bulky push-in style cable management devices and adhesive clips
- Ultra-low profile design
- Metal product rigid fixed to the PCB via re-flow soldering process
- Can also be used to provide a path to the ground plane for coax cable, significantly improving the EMC performance of the system
- Range accepts 0.90mm to 3.00mm diameter cable
- Packaged in EIA-481-2 compliant tape & reel packaging

Benefits

- Saves time, costs and space
- Reduces costs by taking an operation out of the assembly process
- SMT Cable Clips offer an improved solution for cable management over traditional products
- Plated metal clips do not degrade over time and will not become brittle like plastic clips
- Clips will not rotate or move during service
